Description

This 4.5" Flush Mount Granite blade has won us praise from many of granite fabricators who demand clean cuts & blades that will not chip their materials. Bring in the Zipper FM Granite Blade which is designed with a zipper tooth segment that provides aggressive cuts while maintaining the cleanest, chip free cuts in the business. This blade also features cooling holes so your blades will not warp. 4 Counter-Sunk holes allow for flush cuts.

This 4.5" blade is .070 thick, & has a 7/8 - 5/8 Arbor with the flush mount holes & a 10MM Rim.
